

Joshua Atta Amoako

Software Engineer

I'm an enthusiastic developer with a couple of years of programming experience. I love creating innovative programs that enhance organizational efficiency. Always learning and keeping up with the latest tech trends. My goal is to leverage my skills to build user-friendly systems that drive efficiency and solve real-world problems. I excel at crafting customized solutions to meet specific needs and believe in constantly improving.

Work Experience

Web Developer

2023 - Present
Personal Project

Invented a ready production blockchain application that allows users to create pages with an on-chain editor and perform other awesome activities on the blockchain. This application is the first web3 decentralized application that can serve as an email service.

Web Developer

2020 - Present
Self and Clients

Developed a website for a construction agency for consultations and exhibition of their amazing works.

Developed dashboard for managing multiple frontends

Developed a minimal blockchain minting application with Solidity, HTML and CSS.

Technical Assistant

2021 - 2023
Beibu Gulf University
Qinzhou, China

Served as a Technical Assistant, handled digital resources and engaged in hardware tasks and remote PC support during my University time for a Professor. Providing assistance for computer-related stuff efficiently.

Intern Engineer

2022 - 2022
Jianju Technology
Qinzhou, China

Worked as a junior technical engineer under senior engineers who supervise the production and application of the two basic core technologies of Jianju technology.

ICT Teacher

2017 - 2018
Qualitek Primary School
Obuasi, Ghana

Worked an Information Communication Technology teacher at a basic school after high school.

Contributed to helping kids that time to understand computing and grasp basic computer knowledge.
